IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Previously presented) A method of presenting content by means of a display unit, the method comprising the acts of:

connecting or attaching the display unit to a first location relative to a media device;

determining, by the media device, the first location of the display unit;

determining, by the media device, a first information item representing content, wherein said first information item is selected based on said first location relative to content presented on the media device;

transferring, by the media device, the first information item to the display unit; and

receiving and presenting said first information item on the display unit.

2. (Previously presented) The method as claimed in claim 1, wherein the step of determining the first location of the display unit comprises the acts of:

transmitting, by at least one transmitter located on the display unit, at least one signal identifying said display unit;

receiving, by at least one sensor located on the media device, at least one identifying signal; and

determining, by the media device, the first location based on at least one identifying signal.

3. (Previously presented) The method as claimed in claim 1, wherein the method further comprises the acts of:

disconnecting the display unit from the first location;

connecting the display unit to a second location relative to the media device; and

determining, by the media device, a second information item representing content, wherein said second information item is selected based on said second location relative to content presented on the media device.

4. (Previously presented) The method as claimed in claim 1, wherein the media device is a personal computer, a television, a camera, a video camera, a game unit or a mobile unit.

5. (Previously presented) A computer system for performing the method as claimed in claim 1.

6. (Previously presented) A computer program product comprising program code means stored on a computer readable medium for performing the method of claim 1 when the computer program is run on a computer.

7. (Previously presented) A display unit for presenting content, said display unit comprising:

means for connecting or attaching to a first location relative to a media device;

means for transmitting, by at least one transmitter located on the display unit, at least one signal identifying said display unit; and

means for receiving and means for presenting a first information item representing content, wherein the first information item is selected based on said first location relative to content presented on the media device, and wherein said first information item is sent from the media device.

8. (Previously presented) The method as claimed in claim 1, wherein the act of determining the first information item is performed automatically in response to the display unit being connected or attached.

9. (Previously presented) The display as claimed in claim 7, wherein the means for receiving the first information item is

arranged to automatically receive the first information item in response to the display unit being connected or attached.

10. (Previously presented) The display unit of claim 7, wherein the display unit is one of a hexagonal, triangular, circular and elliptical layout.
